

# Active Learning...

... is when **the learner takes responsibility** for developing their own **attitudes** and **values**, and gaining the **knowledge** and **skills** to **improve** their own **understanding** of the world they live in.

Active Learners are **curious, reflective and future ready.**

**I can be an active learner by:**

- using and exercising my brain
- thinking about learning and the topic being taught
- problem solving
- asking relevant questions
- discussing topics and learning with others; listening to other ideas
- using the reflection mat
- taking part in the learning process
- sharing and debating ideas
- knowing what I am able to do and what I need to do next to improve
- understanding Flight Paths (KS3) and Pathways (KS4)
- venturing into the learning pit!
